Selling Genomed products online

What has to be in place before the online shop can go live. Permissions, documents and decisions only - no technical work is described here. Prepared 19 September 2026.

1. Why this is different from an ordinary online shop

Genomed's products are **Ayurvedic proprietary medicines**. Under Indian law they are drugs, not food or cosmetics. Three consequences follow:

- Payment companies (Razorpay, Cashfree, PhonePe and others) treat medicines as a **restricted category**. They approve the account only after seeing the drug licence, and the review takes longer than usual.
- Only medicines that contain **no Schedule E(1) ingredient** may be sold without a prescription. Anything on that list cannot be sold through the website.
- The law on **drug advertising** limits what a website may claim a medicine does (see section 3).

2. Licences and registrations

Item	Why it is needed	Status / action
Ayurvedic drug manufacturing licence (UP AYUSH licensing authority)	Already required to manufacture. Every payment company and courier will ask for a copy.	Have. Please share the licence number and a scanned copy - the website's Quality page still shows it as unverified.
GST registration (GSTIN)	Selling goods to customers in other states through a website makes GST registration compulsory, whatever the turnover. Also required by every payment company.	Confirm GSTIN, or register (free, online, about a week).
Business PAN and a current account in the business name	Payment companies pay out only to a business account matching the PAN.	Confirm.
Udyam (MSME) registration	Free, done online in 10 minutes. Accepted as proof of business and unlocks lower rates with some payment companies and couriers.	Recommended.
Trade mark search on product names	Optional. Worth checking Sugar OK, Rimcuff, Heamclear etc. on ipindia.gov.in before spending on marketing.	Optional.

3. Two legal checks that must be done before launch

A. Schedule E(1) check. Schedule E(1) of the Drugs and Cosmetics Rules lists poisonous substances (for example aconite, datura, nux vomica, certain metals). Any formulation containing one of them needs a prescription and must be kept out of the online shop. Only the company can do this check, from the full compositions. The result decides which products can be sold online at all.

B. Advertising review. The Drugs and Magic Remedies (Objectionable Advertisements) Act 1954 bans advertising any medicine as a treatment for a fixed list of conditions. That list includes diabetes, high or low blood pressure, obesity, heart disease, diseases of the uterus, menstrual disorders, sexual impotence, sterility and stones. Some current product claims touch it:

Product	Current claim	Condition on the list
Sugar OK	For healthy blood sugar level	Diabetes
ARQ-15	High blood pressure, high cholesterol, anti-obesity	Blood pressure, obesity
Cistover	Cyst (uterine / ovarian)	Diseases of the uterus
Stroperm	Men's wellness	Depends on wording

A label approved under the manufacturing licence is one thing; a website selling to the public counts as an advertisement. **Action:** have a pharma regulatory consultant or lawyer review the product pages before launch. The usual outcome is that indications are worded exactly as on the licensed label, with no claims of cure, and a 'consult a physician' line on every page (already there).

4. What the website must show by law

Required by the Consumer Protection (E-Commerce) Rules 2020 and the Legal Metrology (Packaged Commodities) Rules 2011. Payment companies also check for these before approving an account.

Requirement	Have / need
Legal name, full address, phone and email of the seller	Have
A named **grievance officer** with contact details, and a promise to acknowledge complaints within 48 hours	Need a name
Country of origin on every product (India)	Easy - need confirmation only
On every product page: MRP, net quantity, manufacturer name and full address, consumer-care phone/email	Partly - need the full manufacturer address
Shipping policy page (areas served, dispatch time, charges)	Need
Returns / refund / cancellation policy page	Need - see decisions below
Terms of use and Privacy policy	Have
Total price including all charges shown before payment	Will be built in

5. Documents to collect for the payment-company account

The same set works for Razorpay, Cashfree, PhonePe and PayU. Scanned copies, clearly readable. Expect 3 to 10 working days for approval because of the medicine category.

[ ]	Business PAN card
[ ]	GST registration certificate
[ ]	Cancelled cheque or a recent bank statement of the business current account
[ ]	Proof of business: Udyam certificate, partnership deed, certificate of incorporation, or shop & establishment licence (any one)
[ ]	PAN and Aadhaar of the authorised signatory (the person who will sign up)
[ ]	Drug manufacturing licence
[ ]	The website address, with the policy pages from section 4 already live

[ ] A business email address on the company's own domain, e.g. orders@genomedpharmaceuticals.com (the Gmail address cannot send order emails)

6. Courier account

A courier aggregator (Shiprocket or iThink Logistics) gives one account for many couriers, with cash on delivery, pickup from Bulandshahr and tracking. Free to open; you pay per parcel (roughly Rs 30-50 for a 500 g parcel within India, plus about Rs 30-40 or 2% for cash-on-delivery orders). India Post Speed Post is the cheapest fallback and reaches every pincode.

- Needed to open the account: GSTIN, PAN, bank details, pickup address and the days/hours pickups can happen.
- Seven of the ten products are liquids in glass bottles. They can be sent by surface courier if sealed and packed in a box with cushioning. Breakage is the usual reason for a return, so packing material needs to be arranged.
- Every parcel must carry a GST invoice showing the batch number and expiry. Only stock with at least about six months' shelf life left should be sold.

7. Decisions needed from the owner

These cannot be decided by anyone else, and the shop cannot be designed until they are answered.

Decision	Options / notes	Answer
Who do we sell to online?	Consumers only; distributors and clinics only; or both. Selling to distributors needs a login and a separate trade price list.	
Cash on delivery?	Yes / no. It is still a third to a half of Indian online orders. If yes: is there a surcharge (commonly Rs 30-50 on orders under Rs 500)?	
Minimum order value	For example Rs 300, so that courier cost does not exceed the order.	
Shipping charge	Free above a threshold (e.g. Rs 500) and a flat fee below it; or actual courier cost.	
Returns and refunds	Standard for medicines: no returns except damaged or wrong item, reported within 48 hours with photos; refund to the original payment method within 7 days.	
Which products go online	After the Schedule E(1) check in section 3.	
Grievance officer	Name, phone, email.	
Payment company	Razorpay and Cashfree are the recommended two; apply to both so that one approval unblocks launch.	

8. Costs

There are no set-up fees. Running costs at launch:

Item	Cost
Website hosting (a paid plan is required for a shop)	About Rs 1,700 per month
Order records, e-mails, enquiry forms, courier account	Free tiers - Rs 0 at launch

Item	Cost
Payment company	No monthly fee. UPI is free or near-free (government rule); cards and net-banking about 2% + GST per order
Courier	Per parcel only, as above
Regulatory review of product wording (one-off)	Consultant's fee - to be quoted
Domain	Already owned

Example: an order of Rs 476 paid by UPI at 0% reaches the company in full; paid by card it reaches the company as about Rs 465; paid cash on delivery it reaches the company as about Rs 436, a week later.

9. Order of work

Step	Who	Time
Schedule E(1) check of all compositions; decide which products go online	Company	1 week
Answer the decisions in section 7	Owner	-
Regulatory review of product-page wording	Consultant	1-2 weeks
Confirm GSTIN, business account, Udyam; collect the documents in section 5	Company	1 week
Set up orders@ e-mail on the company domain	Company / web team	1 day
Apply to Razorpay and Cashfree; open the courier account	Company	3-10 working days for approval
Write shipping and refund policies from the decisions above	Web team, owner signs off	2 days
Build the online checkout (not covered here)	Web team	After the above

Most of the first six steps can run at the same time. The whole preparation is realistically three to four weeks, most of it waiting on approvals.
